

HandCalcPro

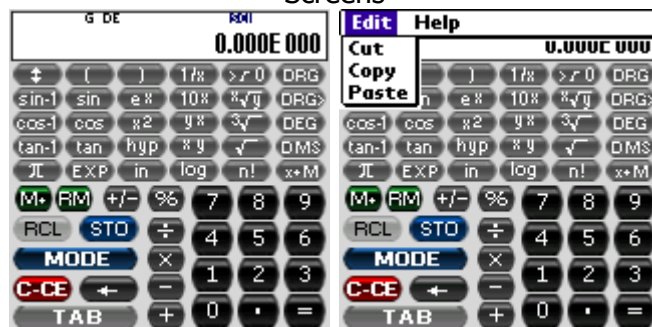

This calculator is designed to operate as Scientific in modes Scientific, Engineering, Regular and Broker. To make possible doubts access the manual for basic icon (i) on top of this screen.

All functions of HandCalcPro you already know but read below about MODE button.

However a key resource here explain the MODE button. Through the Mode button you can switch between modes normal, fix, Scientific and Engineering. You see the change appears on the screen where the icons in blue (Fix, Sci and Eng) for the normal icon does not appear in this way you make calculations as if you were using a basic calculator.

1.0 - For all models with Palm System (ram 101 KB)

Screens

Need file system MathLib.prc (rare model of Palm without he, but...)
