## AUTROLA USER MANUAL

This manual is intuitive as our software, is enough to observe the images to understand as to use best of and the more efficient form. The screens follow the logical order of the presentation them tools in the interface of each software.

### Autrola

Player for music and podcasts in MP3 and WAV, without conversions, direct memory card. Success in Brazil in nearly two years, now in English. With resources to play, pause, stop, play next, play preview, tapping the list indefinitely, delete and add. It still controls: Volume, Balance and Equalizer, in addition to providing detailed information of each audio file as: Title, Artist, Album, Year, name, duration, Bitrate, Frequency and Channels. And more: the Autrola play in background, you can use other programs, play, while listening your musics or simply leave it playing.

### 1.0 - PALM OS 5.0 or superior and card reader (ram 320 KB)

**Important: It only works on palms with entry to card and system of sound (stereo or mono).**

### Install

Just unpacking the zip on the desktop and give a double click the file **Autrola.prc** the tool installation of your Palm will open showing the file being synchronized, synchronize and ready.

**Install the plugin also sMP3pn.pdb that accompanies the program.**

You recognize by the icon on the side.

Interface inicial

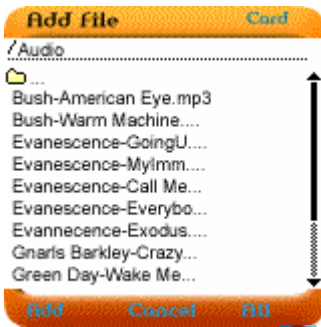

Here you have the interface with the controls and the list of MP3/WAV files, music or podcast.

### INSTALLATION OF ARCHIVES OF AUDIO

Just drag it to the installer of Palm, MP3 and WAV files to the area of the card, which is at the bottom of the installer. Synchronize and await the process of synchronization be completed (depending on the volume of files can take about half an hour).

**Recommendation:** Use only MP3 files because it has a rate of compression that makes the files smaller ex. File from mp3, 3 mb equivalent on average to a wav file of 30 mb.

Clicking on the button  above the screen appears, you then select all files visible on the list, or click one by one selecting only those who want to be seen in the list to play. After selecting, simply click the button add. The list appears in the interface's home Autrola as shown in the screen below:

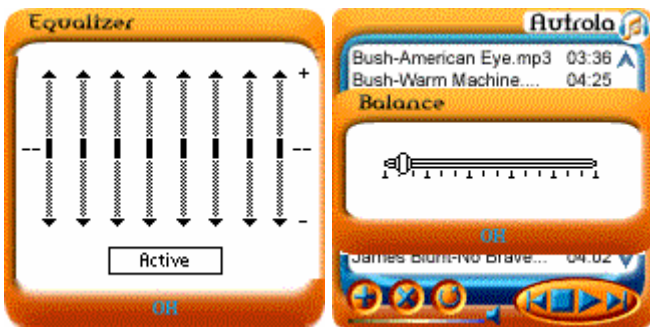

With the list assembled simply adjust the volume by clicking once on the icon of the auto speaker, bar appears with the slider, down the volume decreases upward increases.

To delete a file from the list just click on it once and then click the button .

To tap the list of files indefinitely simply click once on the button .

These buttons are respectively from left to right touch the file up, stop, play (which can be replaced by the button  to pause with a touch and return to play also with a touch), the last button is the right to play the following .

To access the other controls and Balance and Equalizer just click at the top of the screen for the menu that appears, choose the control you want to adjust. We recommend that before making adjustments, a listen first one music then make adjustments. The equalizer it can create distortions, more common in palm models with monaural sound like the Tungsten C.

By choosing the option to see infos of the file you will have access to details of the file as: Title, Artist, Album, Year, name, Pasta, duration, Bitrate, Frequency and Channels.

By choosing the option About Autrola will have access to the basic help Autrola by (i) icon at the top right of your screen.

**Important:**

Not sync with the Autrola in **pause**. Unplug it and leave it or leave while playing synchronizes.

**He plays in the background even with the sync in progress.**
