SURGEON USER MANUAL

This manual is intuitive as our software, just watch the images to understand how to use the best and most efficient way. The screens follow the logical order of the presentation of the tools in the interface of each software.

Descriptive

Suite of 12 tools integrated into a single interface to help the surgeon to record, monitor and organize information from surgery of the your patients. It offers tools to record and organize registration of patients, anamnesis, surgery, physical examinations, laboratory exams, imaging exams, diagnosis, post surgery, medication and other treatments. It also offers tool for reports, agenda and diary. In English.

1.0 - PALM OS 3.5 or superior (ram 126 KB)

Install

If you received the program by e-mail, just unpacking the zip on the desktop and give a double click the file **surgeon.prc**, the tool installation of your Palm will open showing the file being synchronized. Synchronize and ready, or at the next synchronization will be installed.

You recognize the icon on the side.

Tools

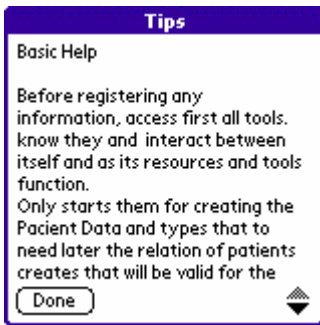

Initial Interface

Here select the tool you wish to use.

By clicking on the button "?" On the home screen you can customize your copy of the Surgeon with your name or other information it deems useful as the Hospital or Clinic.

Basic Help, you access by icon "i" on home screen.

Here as on the screens of other tools you choose the option from the menu of action it deems necessary. Note: You may copy of Memos from his Palm all the information and put on the surgeon as well as copy and paste it to use in Memos from the Palm Desktop. In the button beam tools, facilitates transfer to another Palm that has the Surgeon installed information from patients between colleagues.

Here as on the screens of other tools you choose from the menu and access the standard palm tools and shut return to them directly to the surgeon.
