## INFOLOCK USER MANUAL

This manual is intuitive as ours softwares, is enough to observe the images to understand as to use best of and the more efficient form. The screens follow the logical order of the presentation them tools in the interface of each software.

Projected software to organize and to store personal information and or professionals of safe form. It possesse password of access of 128 bits. Structuralized of form to be flexible in the register of the information offering levels of priority, programmed actions, and extra options beyond being able to have all the information organized in categories.

### 1.0 - PALM OS 3.5 or superior (ram 105 KB)

#### Instalation

Installation If you received the program for email, are enough to unpack zip in the work area and to give a double click in the archive Set **infolock.prc** the tool of installation of its Palm will go to open presenting the archive to be synchronized, synchronizes and ready or in the next synchronization it will be installed. If you he bought the compact disc is enough to use the installer or to have access for the Windows Explorer the directories, to give a double click in the archive Set **infolock.prc**, the tool of installation of its Palm will go to open presenting the archive to be synchronized, synchronizes and ready or in the next synchronization it will be installed.

You he will recognize it for icon to the side.

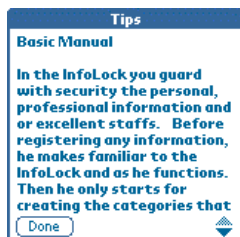

#### Initial Interface

In the InfoLock you guard with security the personal and professional information. Here you register in cadastre its safe password and are the initial interface of the InfoLock.

**Important:** Before registering in cadastre any information, it is made familiar to the InfoLock and as it functions. Only then it starts for creating the categories that to need later the relation of information creates. It adds the password that to judge necessary to store with security its information.

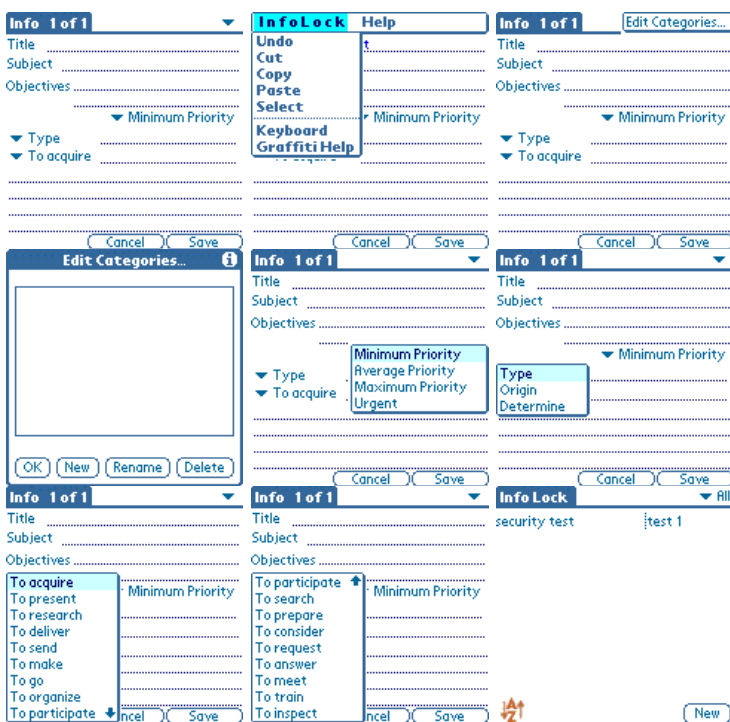

The Basic Help you have access click in the (i) in the top of the initial screen.

## Security

The password system is so powerful that if you will have of reset the Palm the password is made unusable. You will have to erase the Inflock.pdb file to be able to create a new valid password. Another resource to increase the security was to exclude the option To erase (it will be able to reedit and any all info) thus nobody will not be able to zero the base of information and for this it is enough that it erases in palm the archive ilok.pdb.

Here you visualize the information and organize the visualization for the categories that created. He still visualizes commanding of the A a Z or Z a A using the left inferior button.

In the screens above you see as to register in cadastre the information and as will go visualizes them.

To change of password you need to have access the InfoLock and in the screen of the list of infos for the superior menu has access the screen password exchange, you will be able there to make the exchange.
