## WARN USER MANUAL

This manual is intuitive as our software, is enough to observe the images to understand as to use best of and the more efficient form. The screens follow the logical order of the presentation them tools in the interface of each software.

### Warn

With this program you can organize any type of warning to be remembered, by date and time. With it you organize groups of shares that may be linked to one of 12 screens of alert. Thus meetings can be only on screen 1, medical consultations in 2 and so on. You will be warned by 2 types (visual-the palm turn on directly on the screen of the warning and sound-bip of palm). In internal manual you can see more tips on how to use this tool indispensable. In English.

### 1.0 - All models with Palm System (ram 206 KB)

### Install

Just unpacking the zip on the desktop and give a double click the file Warn.prc the tool installation of your Palm will open showing the file being synchronized, synchronize and ready.

You recognize by the icon on the side.

### Interface inicial

Here you choose which warning will be configured and where it can add types of warn.

### Tips

**Creation of types:** create all sorts of warning: awakening, meeting, birthdays, medical consultation, schedules of medicines, date of school exams, flight, meeting, happy hour, and everything you imagine.

**Use of each warning:** defining for example, that the warning 1 is to awaken, then choose down menu types of the option awakening, check the date and time, then click on the icon again and repeat the operation only changing the minute, say 7 : 00, following 7:01, as many as you need to wake up. Set then the 2 through the drop-down meetings simply write on the screen white to meeting, set day and time. To fly even for one week hence the alert will notify you.

**Types of warning:** visual- the palm start on the screen of the warning, (the colors of the screen were studied to draw the attention and the text is in large letters);

sound- a bip (which may have its volume adjusted accessing preferences of palm and place the sound of the alarm the volume you desire).

Here you access by the icon (i) at the top of the home screen to basic help.

Here you add all kinds of warning.

In screens below you see how simple and quick plan everything that needs to be warned.

Here direct access to basic palm tools (eg go memopad copy anything back directly for Warn paste, and vice versa)
